Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/029,551	Applicant(s) PARIKH ET AL.	
	Examiner Christine J. Saoud	Art Unit 1647	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 April 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3, 19-24, 28, 29 and 39-56 is/are pending in the application.
- 4a) Of the above claim(s) 1-3, 19-24, 28, 29 and 39-43 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 44-56 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Applicant's response of 13 April 2007 has been received and entered. Claims 4-18, 25-27, 30-38 and 57-58 are canceled. Claims 1-3, 19-24, 28-29, 39-56 are currently pending. Claims 1-3, 19-24, 28-29 and 39-43 are withdrawn as they are directed to an invention nonelected with traverse in the reply filed on 26 April 2004. Claims 44-56 are under examination in the instant application.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Any objection or rejection of record which is not expressly repeated in this action has been overcome by Applicant's response and withdrawn.

Applicant's arguments filed 13 April 2007 have been fully considered but are not persuasive.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 44-56 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Conteas et al. (Proc. Soc. Exp.

Art Unit: 1647

Biol. Med. 184(3): 307-311, 1987) for the reasons of record as applied to claims 44-56 in the previous Office action(s).

As stated previously, Conteas et al. teach the administration of gastrin and EGF, either alone or in combination (see page 308, column 1, lines 12-16). The gastrin and EGF were procured from Peninsula Laboratory and Collaborative Research, respectively. Therefore, it would be fair to conclude that the gastrin and EGF were in vials for shipment and were in close proximity to one another at some point in time (i.e. in the refrigerator or in a cabinet – together in a refrigerator or a cabinet could be considered a “container”). This would constitute a “kit” because the two components were together for use alone or in combination.

Conteas et al. is silent as to whether the gastrin and/or EGF were lyophilized or hydrated. However, it is standard procedures for biological agents to be shipped in a lyophilized form because they are usually more stable. It is also common for biological agents to be shipped in a sterile aqueous buffer. Conteas et al. does not indicate the form in which the gastrin and EGF were obtained, but it would have been *prima facie obvious* for them to be either as lyophilized powders, which could be rehydrated using a sterile buffer or water, or for them to have been in a buffer solution to begin with. If the gastrin and EGF were obtained in a lyophilized form, it would have been *prima facie obvious* to have included a buffer solution with the agents for rehydrating them for use. This buffer, be it water or saline or some other appropriate buffer, would also be expected to be sterile since the agents are biological agents and would be administered as such, requiring the composition to be sterile. As stated in the instant specification,

Art Unit: 1647

pharmaceutical formulations are old and well known in the art (see Remington's *Pharmaceutical Sciences*, cited at page 11 of the specification).

The art of Conteas et al. does not indicate what form the gastrin and EGF were in, or whether a buffer was also present with the biological agents. However, Conteas et al. does teach that the two agents could be administered alone or together with therapeutic applications. The instant claims are merely directed to the same two biological agents of the prior art, in a box together, including a buffer to rehydrate the agents if they are in a lyophilized form. Further included in the claims are instructions for an intended use. These recitations do not physically change the biological agents which are known in the art and used by skilled artisans routinely. The inclusion of the printed material does not change the nature of the biological agents of the claims. Nonfunctional descriptive material cannot render nonobvious an invention that would have otherwise been obvious. In re Ngai, 367 F.3d 1336, 1339, 70 USPQ2d 1862, 1864 (Fed. Cir. 2004) (combining printed instructions and an old product into a kit will not render the claimed invention nonobvious even if the instructions detail a new use for the product). In re Gulack, 703 F.2d 1381, 1385, 217 USPQ 401, 404 (Fed. Cir. 1983) (when descriptive material is not functionally related to the substrate, the descriptive material will not distinguish the invention from the prior art in terms of patentability).

In so far as claim 46 may (or may not) encompass the gastrin and EGF in combination (i.e. in the same vial, mixed together), this embodiment would have been prima facie obvious in view of Conteas et al. because Conteas teaches that the gastrin and EGF could be administered in combination. If they can be administered in

Art Unit: 1647

combination, it would have been *prima facie obvious* to have them in combination prior to administration, i.e. in the same container, mixed together. Conteas et al. may anticipate the claims if when the two biological agents were administered, they were placed in the same syringe or other device for the administration. Further, if one were administering the two biological agents to a patient for a particular purpose, it is common to include the biological agents into an i.v. bag for intravenous administration. In this situation, the limitations of the claims would also be met.

Applicant argues at page 8 of the response that a person skilled in the art would not reasonably conclude that a refrigerator or a cabinet constitute a kit for administration of sterile components to a patient and that Conteas lacks any disclosure of packaged material comprising sterile gastrin and sterile EGF components. Applicant's arguments have been fully considered, but are not persuasive. Conteas et al. clearly teach gastrin and EGF, which appear to be sterile considering they were obtained from pharmaceutical companies, and the fact that they were used together would imply the presence of a "kit". The recitation of intended use does not distinguish the claimed composition from that in the prior art. A recitation of packaged material does not provide patentability to the gastrin and EGF of Conteas, which is already in the public domain and taught by Conteas. Conteas teach the use of gastrin and EGF in combination, therefore, placing the two components together in a "kit" is either anticipated by Conteas (as explained above) or is clearly obvious based on the fact that Conteas teach use of the two components together for a given purpose absent evidence to the contrary.

Art Unit: 1647

Applicant argues that Conteas do not teach the administration of gastrin and EGF either alone or in combination or for therapeutic applications, and a kit for therapeutic applications would not reasonably flow from the teachings of the publication. Applicant's argument has been fully considered, but is not persuasive. However, intended use is not a limitation that needs to be met by the prior art – if the composition is in the prior art, then it meets the limitations of the claims. Furthermore, because Conteas teach the coadministration of the two components of the kit, Conteas clearly teach motivation for putting the two components together if not already anticipating the combination. With regard to therapeutic applications, Conteas teach that the coadministration of gastrin and EGF stimulate the proliferation of small intestine crypt cells, which has direct application to treatment of a number of conditions in mammals requiring proliferation of cells of the intestine. Therefore, Conteas et al. clearly teach the motivation to use sterile, pharmaceutically acceptable forms of gastrin and EGF together, absent evidence to the contrary.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422

Art Unit: 1647

F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 52 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 7 of U.S. Patent No. 6,288,301. Although the conflicting claims are not identical, they are not patentably distinct from each other because the recitation of "a kit" does not distinguish the pharmaceutical composition of the instant claim from the pharmaceutical composition of the patented claim. A recitation of intended use does not physically limit the composition being claimed, and therefore the claims encompass the same compositions, absent evidence to the contrary.

Applicant states that a terminal disclaimer will be submitted upon indication of allowable subject matter. This statement is not sufficient to avoid the rejection.

Conclusion

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1647

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christine J. Saoud whose telephone number is 571-272-0891. The examiner can normally be reached on Monday-Friday, 6AM-2PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Nickol can be reached on 571-272-0835. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
